ZONoeaTM

Oleylethanolamide

ZONOeda™

OLEOYLETHANOLAMIDE (OEA)

What is OEA?

OEA as a lipid mediator and bioactive endogenous ethanolamide fatty acid which is structurally similar to the endocannabinoid system compounds. It is synthesized in cells of the small intestine, adipose tissues, neurons & astrocytes.

Dietary sources of OEA are oatmeal, nuts and cocoa powder; however, the amount of OEA found in them is low (less than $2\mu\text{g/g}$). This bioactive amide plays a significant role in regulating metabolic processes, promoting satiety, and maintaining energy balance, OEA promotes angiogenesis, neurogenesis, and enhances white matter integrity.

OEA acts as a key modulator in managing fat metabolism and appetite control, it may also offer therapeutic benefits for aging and Alzheimer's disease by improving lipid metabolism, making it a valuable ingredient in modern health solutions.

HARNESSING THE BENEFITS OF OEA FOR HEALTH AND WELLNESS.

WHY ZONOEa™?

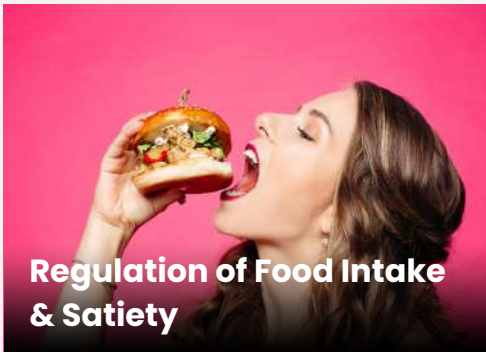

ZONOEa's unique mechanism of action through PPAR- α activation makes it highly effective in promoting fat breakdown, improving energy expenditure, and reducing overeating. Beyond its metabolic benefits, ZONOEa™ exerts neuroprotective effects by modulating microglia polarization via PPAR- α , particularly after cerebral ischemia, additionally supports gut health, positioning it as an ideal ingredient for health and wellness products.

WHY CHOOSE OUR ZONOEa™?

As a leading, established manufacturer, we prioritize the highest standards of quality, purity, and consistency in every batch. Our ZONOEa™ is produced and processed with precision to ensure maximum potency for a wide range of applications. With the growing demand for functional ingredients in the wellness market, our ZONOEa™ helps drive innovation in dietary supplements, pharmaceuticals, and functional foods.

KEY FEATURES

- Activates PPAR- α to enhance satiety and meal termination.
- Stimulates fatty acid translocase (FAT)/CD36 for improved lipid metabolism, lipolysis, and beta-oxidation.
- Supports appetite regulation through hedonic (dopamine) and homeostatic (oxytocin, histamine) pathways.

- Promotes angiogenesis and neurogenesis, enhancing brain function.
- Protects against neuroinflammation and oxidative stress, improving cognitive health.
- Potential therapeutic benefits for Alzheimer's and other neurodegenerative diseases.

- Modulates gut microbiota composition, increasing beneficial bacteria (e.g., *A. muciniphila*).
- Reduces intestinal permeability and inflammation, supporting gut integrity.
- Improves energy and carbohydrate intake, supporting obesity management.

- Modulates fat consumption and energy homeostasis.
- Reduces body fat accumulation by influencing lipid metabolism.

KEY BENEFITS

- ⦿ **Supports Weight Management by promoting satiety and regulating fat metabolism.**
- ⦿ **Helps Enhance Cognitive Function with neuroprotective and anti-inflammatory properties.**
- ⦿ **Promotes Gut Health by improving microbiota composition and reducing intestinal inflammation.**

APPLICATIONS

Pharmaceuticals targeting obesity, neurodegeneration, and inflammation

Dietary Supplements for weight management and metabolic health

Functional Foods to improve satiety, gut health, and cognitive function

Explore!

The Potential of ZONOea™ in Your Products!

Contact us to learn more about how ZONOea™ can elevate your formulations and enhance consumer well-being.

Whether you're formulating cutting-edge products for weight loss, brain health, or gut support, ZONOea™ can elevate your offerings to meet the growing demand for holistic health solutions.

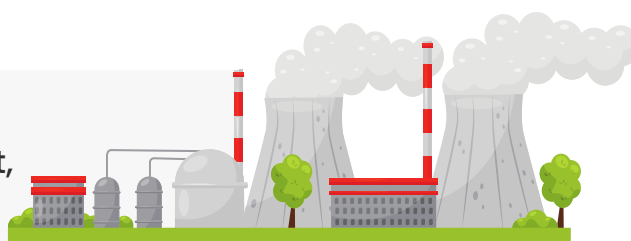

Partner with Us Today!

Reach out to learn how ZONOea™ can transform your formulations and deliver tangible health benefits to your customers.

TECHNICAL SPECIFICATIONS OF ZONOeaTM

TESTS	REQUIREMENTS
Description	White Crystalline powder
Identification	
• By FTIR	The Infrared absorption spectrum of the sample should be concordant with the spectrum obtain from standard
• By HPLC	The retention time of the major peak in the chromatogram of the assay preparation should correspond to that in the chromatogram of the standard preparation, as obtained in the assay.
Purity by HPLC	Not less than 85.0 %
Other Amides	Not more than 15%
Water content by KF (%w/w)	Not more than 0.5 %
Melting Point (°C)	Between 58°C to 66°C
Ash (%w/w)	Not more than 0.10 %
Residual Solvent (class III solvent)	Not more than 5000 ppm
Total Heavy Metals	Not more than 10.0 ppm

Production in a GMP and TUV Nord approved ISO9001 : 2015 environment, under brand name ZONOea.TM
