

RELEASE AGENTS
and **LUBRICANTS** for
DIE CASTING

THE SPECIALIST FOR RELEASE AGENTS AND LUBRICANTS

In over 100 years that began as a lubricant-dealer, Geiger + Co. Schmierstoff-Chemie GmbH has developed into a leading producer of high-quality release agents and lubricants for die casting. Located since the beginning in Heilbronn, our headquarters have always been adapted and modernized to current needs. "To stay on the ball" and the constant determination to produce a better product has been our recipe of success for years.

» We have developed, produced and sold successfully Trennex Release Agents and Lubricants for the NE-Metal Die Casting for over 60 years. We are deliberately specialized exclusively in these products in order to be able to offer special services to the die casters. «

Christian and Helmut Geiger, Managing Directors

OUR COMPANY IN NUMBERS.

Founding	1914
Employees	30
Total Storage Space	ca. 21,500 ft ²
Experience with Lubricants	over 100 years
Experience with Release Agents	over 60 years
Certification	ISO 9001:2015

Status: May 1st, 2023

THE SUCCESS CAN BE SEEN IN THE CASTING

Release agents and lubricants are essential in die casting foundries and play a key role in the production of high-quality cast parts. With the perfect release agent and lubricating effect of our TRENNEX®-Products we have achieved a clear prerequisite for an error-free casting cycle and provide impeccable casting surfaces and clean molds.

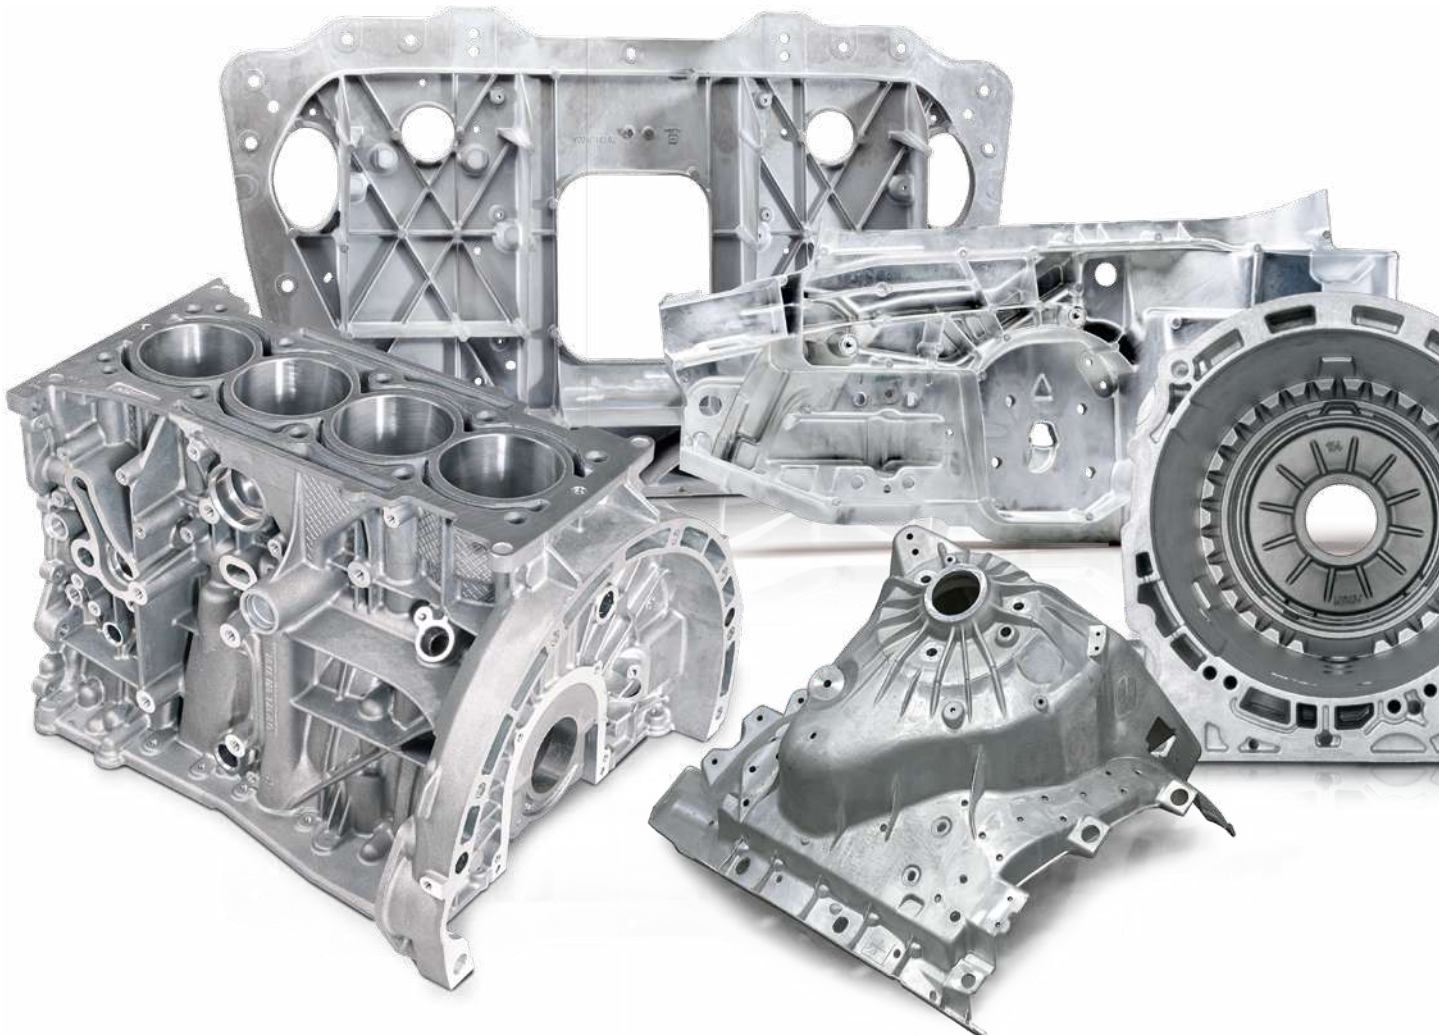

Lean management along with lean production allow us to offer our products at an optimal price-performance ratio. Quality is always our priority. We are not cheap – but it's worth it!

TRENNEX®-PRODUCTS – GOOD ARGUMENTS FOR YOUR SUCCESS

In order to be just as successful in the future as in the past, constant improvement is our goal as we continue our line of successful products. There are already many reasons why TRENNEX® is the right solution for you.

- Improved casting outcome
- Increased mold service life
- Reduced die lubricant usage
- All types of water-based and water-free die lubricants
- All types of plunger lubricants (Granulates, Oils, etc.)
- All types of pasty die lubricants

PRODUCTS POURED WITH TRENNEX

STRONG IN DEVELOPMENT – STRONG IN PRACTICE

We are always informed by the constant dialog with the die casters about current developments and technical innovations. This way we can design and develop the TRENEX®-Products specifically for the needs of the die casting practice.

Using scientifically-grounded methods in our labs during the selection and development of new active ingredient combinations, TRENEX®-Release Agents and Lubricants are always on par with the newest level of technology.

Our competent team of technicians and chemists work together in our labs on the development of new active ingredient combinations.

FUTURE-ORIENTED TEAMWORK With our years of experience working closely with our customers we have an intimate knowledge of their needs. With creative teamwork we accomplish what is necessary for the solution of all challenges and customer-oriented product developments. This way of working as been proven by success but this success also means obligations for the future.

RESOURCE CONSERVATION THROUGH INTERNAL PROCESS OPTIMISATION By setting up a photo-voltaic system with a footprint of more than 300 square meters we produce most of the electricity needed for the production of our release agents and lubricants autonomously. For additional amounts we only use electricity from renewable sources. Besides the continuous development of our products concerning environmentally compatible raw materials and the conservation of resources in the products applicability, we consider such internal process optimization essential on the path to sustainability and climate neutrality.

CERTIFIED QUALITY – ENVIRONMENTALLY FRIENDLY PRODUCTS In line with our ISO 9001:2015 certified Quality-Management-System, all raw materials, intermediate and finished products as well as entire processes undergo constant inspection and are continuously improved. An environmentally-aware selection of the active ingredient components and exact measuring procedures see to it that TRENnex®-Products put as little strain on the environment as possible. In relation to this, the theme “Environmental Cleanup of Used Release Agents” has also been accommodated by the users.

FLEXIBLE PRODUCTION, BROAD PRODUCT SERVICE

Quality is always the result of high goals, hard work, intelligent methods and able design. Forward-looking process engineering with modern production facilities and a large work environment are what guarantee a smooth production process at a constant, high-quality standard.

Ample storage space for raw materials and finished goods guarantee a high readiness for delivery. For our customers this means a high amount of security by fast order processing with very short delivery times.

Production facilities and packaging of our products are multi-functional and have high product security.

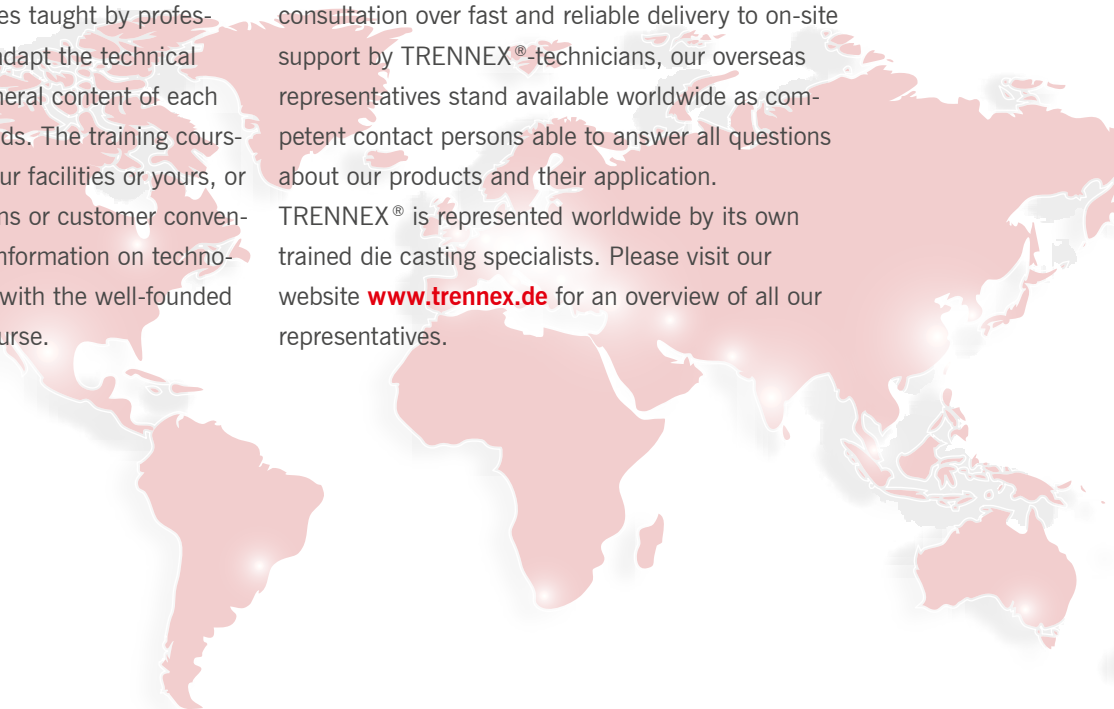

COMPREHENSIVE PRODUCT SERVICE Our advising and service features ensure that TRENNEX®-Products are optimally used, from both a technical and financial standpoint. This includes checking the concentration of the lubricant dilutions, water analyses and details for waste water treatment after application of the die lubricant, as well as extensive technical consultation based on our years of experience with the die casting process.

ALWAYS UP TO DATE AND COMPETENT That is the slogan for every TRENNEX®-Training Course. Our specialists offer training courses taught by professionals for professionals. We adapt the technical main points as well as the general content of each course specifically to your needs. The training courses can be arranged in either our facilities or yours, or even within in-house exhibitions or customer conventions. This way you will gain information on technology and current trends along with the well-founded knowledge from the training course.

MODERN STORAGE Roughly 13,000 ft² of finished goods storage space is available to ensure a rapid availability as well as efficient order processing. An efficient storage system equipped with mobile client stations optimizes the tracks of our lift trucks and speeds up the order at all cross points of the logistical process. These cross points include incoming goods, order-picking areas, manual storage zones and shipping sites as well as production sites.

CUSTOMERS ALL OVER THE WORLD benefit from the high quality of our TRENNEX®-Products. From consultation over fast and reliable delivery to on-site support by TRENNEX®-technicians, our overseas representatives stand available worldwide as competent contact persons able to answer all questions about our products and their application. TRENNEX® is represented worldwide by its own trained die casting specialists. Please visit our website www.trennex.de for an overview of all our representatives.

TRENNEX[®] — RECEIVE MORE

- Competent Team of Technicians and Chemists
- Permanent development work with new raw materials
- Customer-Oriented Product Development
- Analyses of lubricants and cast parts
- Customer-Training
- Competent Application-Technology
- Represented worldwide by die casting specialists
- Fast and flexible order processing
- High availability of the TRENNEX[®]-Products
